## Placed at the Best

- University College London is currently ranked 8th in the world (QS World University Rankings 2023) and 2nd in the UK for research power.
- After Oxford and Cambridge, it is the University of Manchester which has bagged most Nobel Laureates.
- University of Melbourne is the second oldest university in Australia, and the oldest in Victoria.
- The University of Toronto ranks so well that with a score of 85.5 out of 100, it was only ten points behind the top university on the list, Oxford.
- UBC combines award-winning faculty and groundbreaking research with a flexible, student-centred learning environment that includes innovative and interdisciplinary program options.

# MISSION

The Career Counselling and University Placements department at Delhi Public School Ghaziabad helps students in identifying their academic and career goals, providing guidance, and assisting throughout the college application process.

Our focus is on empowering individuals to make informed decisions about their academic and career paths, based on their unique goals, interests, and needs. The department emphasizes finding the "right fit" university rather than prioritizing a "best fit" university, recognizing that this definition varies for each person.

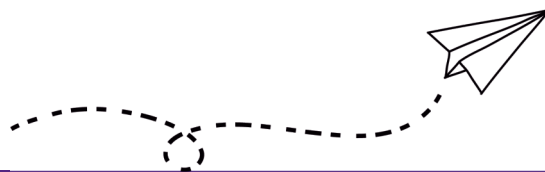

## CCUP's PANDORA BOX

**Myth:** Following one's passion is the only key to success

**Fact:** As we stride through life, our priorities and perspectives often evolve, and what once brought us joy may lose its meaning over time. The key to finding a fulfilling career lies in recognizing the significance of your work. It could be the satisfaction of completing tasks each day, the sense of providing a valuable service to others, or the thrill of facing daily challenges and unleashing your creative prowess. The ultimate goal is to discover what truly resonates with you and brings a sense of purpose to your professional journey.

## Enthralling Tidbits - All About Game Designing

Game designing is a new age career option that has captured the attention of young tech minds. The segment of video game designers has witnessed significant growth since 2019, indicating a promising future. The demand for gaming industry is expected to continue rising, with approximately 1,00,000 new jobs by 2023.
