

DELHI PUBLIC SCHOOL GHAZIABAD SOCIETY

— CAREER COUNSELING & UNIVERSITY PLACEMENTS —

EduEx - 2022

VISIT TO TOP RUSSELL GROUP UNIVERSITIES IN THE UNITED KINGDOM

The Delhi Public School Ghaziabad Society (DPSGS) has always been at the forefront of education, always thinking ahead, adding value based programs to the School Curriculum, and creating exposure and opportunities for its students and staff. It's the very reason why the DPSG Schools are recognized as leaders in education.

The DPSGS is constantly reinventing itself to inspire and empower the students to be lifelong learners, critical thinkers and productive members of an ever-changing global society by facilitating students' access to necessary resources.

Once again, the DPSGS has innovated and created a value based program for its students. It has created the Career Counselling and University Placements (CCUP) program for all its students, which will give unprecedented support to all the students of DPSG Schools and unparalleled access to the Top Universities and Colleges across the globe, both domestic & abroad.

Giving a concrete shape to this vision and utilizing the power of networking, the DPSGS spearheaded the first EduEx UK 2022 trip providing an opportunity to the students to gain exposure of the leading universities of the United Kingdom (UK), giving a wonderful perspective on college life in the UK.

Our first DPSG Alumni – UK Chapter meet held at London has unlocked a new world of possibilities for our students. The objective is to connect with the educational leaders in the global community and provide new horizons to our students. We are undeterred in our endeavour to ensure that the journey of learning continues.

Anshul Pathak

Vice Chairman, DPSGS Society

UNIVERSITY OF SHEFFIELD

'Our pioneering and innovative research is making a real-world impact on some of the greatest challenges facing humanity. This is the future. And it will be Sheffield made.'

This well-crafted statement served as the catalyst to the curiosity and zeal we had while stepping into the University of Sheffield. The very first thing that caught our attention was the magnanimous Diamond Building which takes its name from its unique facade, which comprises a cellular pattern of interconnected diamond shapes made of anodised aluminium. We can say that the building lives up to its name.

The visit helped in fostering intercultural sensitivity and the experiential learning provided the students a sense of achievement of cultural and social awareness to operate in a global environment.

UNIVERSITY OF NOTTINGHAM

"We don't settle for ordinary", were the first words we were greeted with when we visited the official site of the University of Nottingham. And now that we have visited the university, we can say that these words hold value and substance. The student ambassadors, Adiba and Usma acquainted us to the eco friendly buildings, library, sports facilities and the courses that university offers. They both made sure to make our tour both informative and fun.

After this we headed to the Chemical Engineering Lab. There we met with a professor whose passion for his subject astounded us. There we also saw the distillation column about which we had studied in school. It was really amazing to see in real, something we had read in textbooks.

In order to give us an insight of what it is like to be a chemical engineer, the professor asked us to do an experiment wherein we had to purify contaminated water. This experiment made us realise what it's like to think like a scientist and putting on the lab coat added to that feeling.

UNIVERSITY OF WARWICK

We felt so fortunate to be a part of the team which visited the University of Warwick. The University is a very welcoming institution, and in such a short span of time, we got a chance to learn and experience so many new things.

We were able to learn about every opportunity the university provides for students from other countries. It features top-notch amenities, lovely infrastructure, sports, and a vibrant culture. Six student ambassadors from India took an incredible interactive session about their experiences at the university.

QUEEN MARY UNIVERSITY OF LONDON

Innovation and engagement are embedded in the research culture of the university. We got the opportunity to interact with active researchers with a wealth of practical and academic expertise, learn the fundamental principles of telescopes, gain access to some cutting-edge topics like determining the refractive index of air in the Astrophysics lab.

The highlight of the day was meeting students passionate about motorsports who had participated in the IMechE Formula Student Competition.

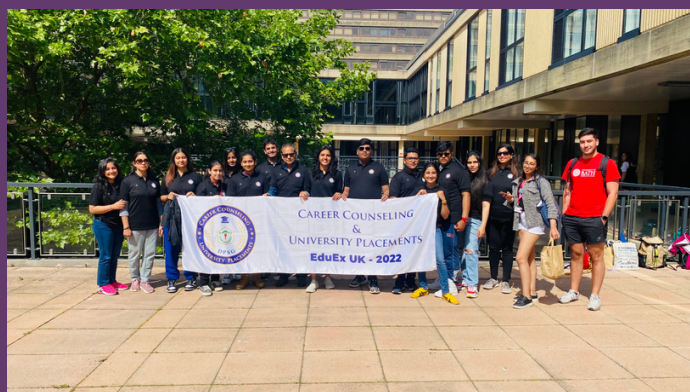

UNIVERSITY OF BATH

Excellence in education and high-impact research that foster an outstanding and inclusive community encapsulate the robust vision of the University of Bath and that is exactly what we witnessed when we took the tour of one of the most promising universities in the UK.

We attended seminars on various facets of commerce wherein the core topics like managing people, business analytics and finance were covered. The lecture on STEM (science, technology, engineering, and math) delivered by academics and industry professionals with expertise in engineering, innovation dawned the realisation that the skills the students graduate with would undoubtedly help in preparing them for the next step in their career

UNIVERSITY COLLEGE OF LONDON

A very affable student ambassador, Antara Basu, took us to a brief tour of the campus. The young ambassador was kind to answer all the questions we had about UCL and we admired the sense of responsibility she displayed.

Nothing fascinated us more than the fact that UCL has given the world 30 Nobel Prize laureates. Fascinating indeed! Our sojourn at UCL was extremely enchanting and enriching and was a dream come true. It was just an overarching experience. UCL is not just an institution but is a legacy and we dream to be a part of this prestigious temple of learning.

UK CHAPTER ALUMNI MEET

“When the roots are deep there is no reason to fear the wind”

It is heartening to see the students emerge as global citizens writing their success stories with panache. Our alumni have always kept us connected to the changing world.

The first ever International Alumni Meet was organised by Delhi Public School Ghaziabad Society in London to foster strong bonds between alumni, students and the school and to create a network enabling them to remain engaged with their alma mater and help shape its future through myriad programmes and services.

The Guests of honour for the occasion were Mr.Vijay Goel, Chairman, Indo European Business Forum and Dr Param Shah, Director, FICCI (UK) as well as a renowned educationist. They were very appreciative of the vision of DPSG in bringing together its alumni across the globe.

While the Alumni Meet brought together 29 DPSGS alumni who are well settled across leadership positions in the UK; it also saw the launch of a pioneering one-on-one mentorship program where our Alumni in the UK shall be adopting one DPSG student from India who is interested in pursuing higher education in the UK. The students who have been a part of our grand University Engagements in the UK were also present on the occasion.
